Summary

Backend-focused software engineer with one year of internship experience building production HR and service-centre systems at Polytron. Develops AI applications with TypeScript, Node.js, and PostgreSQL, including CV analysis, retrieval-assisted script generation, and speech-to-caption workflows.

Work Experience

Polytron Indonesia Jakarta, Indonesia
Software Engineer Intern Feb 2025 – Feb 2026

- Built a warning-letter system with two-level approvals, automated email notifications, and status tracking, replacing manual Word documents and physical signatures.
- Contributed to a queue-management system using Server-Sent Events and browser text-to-speech for live displays and announcements across service centres nationwide.
- Implemented server-side pagination and Metabase SQL reports for contract-worker management; built targeted Redis cache invalidation to resolve stale employee data.
- Integrated internal applications with the central HRIS API and deployed through Docker and GitLab CI/CD; regression-tested a Node.js upgrade and replaced incompatible dependencies.

Projects

VoxReels *Next.js · TypeScript · Express · PostgreSQL · OpenAI · ElevenLabs*
Built a short-form video creation workflow with embedding-based reference retrieval, editable scripts, approval before voice generation, and per-scene voiceover regeneration. Added generated visual assets, a timeline editor, and FFmpeg MP4 export.

CaptionFlow *Next.js · TypeScript · Express · faster-whisper · FFmpeg*
Built an Indonesian video-captioning application that runs local speech recognition through a Python process and produces word-level timestamps. Implemented editable caption timing and styles, saved presets, session expiry, and MP4 export with embedded captions.

CVision *Next.js · TypeScript · Express · Prisma · PostgreSQL · OpenAI*
Built a CV-analysis and candidate-pool application that extracts PDF text and generates structured role-fit analysis. Implemented candidate, HR, and admin roles, submission verification, admin approval of HR accounts, and search across verified candidates.

Airbnb Clone *React · Express.js · MongoDB · Tailwind CSS*
Built a property-booking application with listings, JWT authentication, host and guest roles, and booking management, connecting a React frontend to an Express API.

Skills

Languages:	JavaScript, TypeScript, SQL
Backend:	Node.js, Express.js, REST APIs, JWT authentication, Server-Sent Events
AI / Media:	OpenAI API, embeddings and retrieval (RAG), ElevenLabs API, faster-whisper, FFmpeg
Data:	PostgreSQL, MySQL, MongoDB, Prisma, Redis
Frontend:	Next.js, React, HTML, CSS, EJS, Bootstrap
Tools:	Docker, GitLab CI/CD, Git, k6
Spoken:	Indonesian (native), English (professional)

Education & Research

Bina Nusantara University Tangerang, Indonesia
Bachelor of Computer Science · GPA: 3.82 2022 – 2026

REST vs GraphQL: Performance Benchmarking · Paper accepted at ICIMTECH 2026.
Contributed REST API development, k6 load testing, data evaluation, and paper writing to a three-person research project using Express.js, GraphQL, and Docker.

Volunteering

Teach For Indonesia (TFI) · Environmental Volunteer 2024
Participated in a two-day community programme collecting and sorting waste and processing it into recycled products.
